

# Cleancondens®

For independent cleaning of condensate pumps

The Cleancondens® condensate pump cleaner removes stubborn deposits in condensate pumps of heating and air-conditioning units and achieves highly effective cleaning. By using Cleancondens®, the units achieve a service life that is up to 10 years longer.

## Your benefits:

- Sophisticated technology  
Cleancondens® is 100% biodegradable. It complies with the RoHS and REACH directives. It is not a hazardous material (transport) and does not destroy materials such as aluminium or steel.
- High comfort  
Cleancondens® works independently and can be used for all condensate pumps (heating and air conditioning). The 10-15 minute reaction time can also be used for other service work.
- Reliable operation  
Regular use of the cleaning agent can prevent inconveniences such as breakdowns, faults, defective condensate pumps, boiler room under water, control work, etc..

## Our vision: From condensate to water

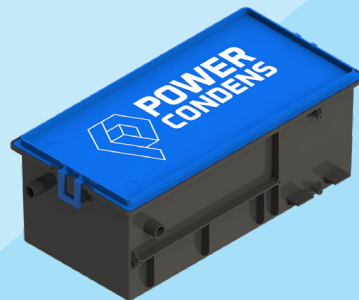

Powercondens® ensures the correct treatment of condensate from heating, ventilation and air conditioning units. The specialist develops and produces well-thought-out solutions, is on the cutting edge and thinks ahead. Together with its sales partners, its innovative solutions and high-quality products, Powercondens® protects man and the environment - reliably since 1999.

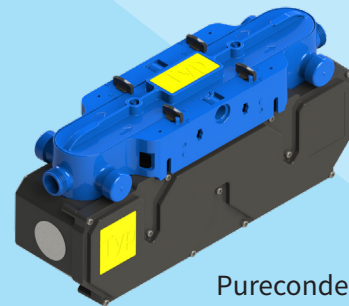

### Our product range:

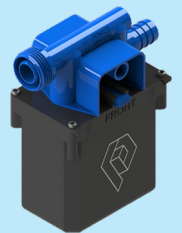

Heatcondens®

Boxcondens®

Purecondens®

Wallcondens®

Aircondens®

Climacondens®
